development of a new product • To design plans for the development of a new	Expected learning outcomes:	General for product and its development, on how to manage the development of a new		
product in the enterprise, product				

- identify the need and adequate time to develop a product in the enterprise
- Competent and active participants in the supervisory team for the development of new product in the enterprise, to carry out an analysis of the needs and time to start developing a product development plan in the enterprise,
- Lead and supervise the development of new product in the enterprise

Contribution to student workload (which should correspond to the students learning outcomes)

Activity		Hours	Days/week	Total
Lectures		4	13	52
Theoretical / laboratory exercises				
Practical work		1	5	5
Contacts to the Lecturer / Consultations		1	5	5
Field exercises				
Tests, student seminars				
Home work		1	10	10
Time of self-study (in the library or home)				35
Final preparation for the exam		2	2	4
Time spent in assessment (tests, quiz, final exam)		3	2	6
Projects, presentations, etc.		1	10	10
Total				127
Teaching methodology:	Interactive lectures with students on the topics taught, orientation in the elaboration of the material by taking case studies that will be discussed in the group, learning based on a presented problem, student presentation and role play, practical lessons for the subject and commitment of the student to present the knowledge gained during the lecture.			
Assessment methods:	Exam 50 point Workshop Seminar-Case Study, Research 50 point			
Facility equipment's – TI	Use of table, internet, wireless, computer, projector, power point, etc.			
Relationship between the theoretical and practical part	60% 40%			

of the study Literature

Basic Literature	1. Philip Kotler & Gary Armstrong "Parimet e marketingut" botimi i 13-te, Tirane 2013,			
Additional Literature	 Besim Beqaj, PhD: "Menaxhimi i zhvillimit te produkteve te reja", Prishtine 2008, Philip Kotler and Kevin Lane Keller - "Menaxhimi i Marketingut" - Londer 2008, edicioni i tetë, 			
Designed plan of teaching:				
Weeks	Lecture to be held			
Week 1:	Presentation - Introduction of students with the subject syllabus, Introduction - Product and Perception			
Week 2:	Identifying customer needs and market research			
Week 3:	The role of marketing in the development of new products, seminar work			
Week 4:	Generating concepts			
Week 5:	Market needs for innovative approaches to products, presentation by students			
Week 6:	Globalization as a determinant of product development, student presentation			
Week 7:	The product life cycle			
Week 8:	Product design, presentations of students			
Week 9:	Technology and market assessment as the determinant of the product			
Week 10:	Introduction to Industrial Design and Human Factors, Presentation of Students			
Week 11:	Estimation of production costs			
Week 12:	Importance of product for the consumer, presentation of students			
Week 13:	Trademarks as product specific			
Week 14:	Classification of products, presentations by students			
Week 15:	Product - the reasons for its failure to market, presentation			
Academic Policies and Rules of Conduct:				

Regular attendance, keeping calm and active engagement in dialogue during lectures and exercises is mandatory.
