| Basic data of the subject | | | |
|---------------------------|--|--|--|
| Academic unit: | Faculty of Management | | |
| Subject title: | Practice Diary | | |
| Study level: | Bachelor | | |
| Subject status: | Compulsory | | |
| Year of study: | II | | |
| Number of hours per | 4 | | |
| week: | | | |
| Value of credits – ECTS: | 5 | | |
| Lecturer of the subject: | Mr.sc.Binaze Jashari | | |
| Contact details: | binaze.jashari@ushaf.net | | |
| | | | |
| Subject discription: | During this subject, students will be acquainted with concrete problems in manufacturing companies, they will be instructed to spend several working hours in companies and institutions in close and open environments. Students will receive specific assignments in their workplaces, the performance of which indicates the level of the acquisition of the knowledge anticipated in the study program. The tasks students receive are directly related to the tasks they need to do after graduation. Students will be monitored by a mentor from a company - an institution that monitors and evaluates performing tasks. During the professional practice, a "Diary" is held, which includes all the activities entrusted to the student. At the end of the practice, a certificate of practice is issued, with the signature of two persons: a teacher and a mentor. In the certificate, the written results, the observed results, or the achievements of the student during the practice are described. | | |
| Prupose of the subject: | The course objective is to meet students in practical conditions with specific problems in the field of engineering management and to have practical knowledge about engineering process. Also, the aim is for students to be able to apply scientific-professional and knowledge in practice. | | |
| Expected learning | After completion of this course the students will be able to: | | |
| outcome: | apply professional knowledge to solve practical, engineering-managerial problems within a selected company or institution. understand the role of management engineers in the organizational structures. understand the critical factors for organizational success. | | |

| Contribution to the student's workload (which should correspond to the student's learning | | | | |

| Teaching methodology: | Professional pra | actice, which lasts 60 ho | ours, is conducted by the | |
| | student in IV | semester under the g | uidance of a teacher - | |
| | practitioner of p | rofessional practice. | | |
| | | | | |
| Assessment methods: | The student pas | sses the professional pra | ctice exam, based on the | |
| | content of the | practical diary he has | s written. The exam is | |
| | submitted and p | presented by the student | as well as the success of | |
| | the practice is ev | valuated from grades 6 to | o 10. | |
| | The student, wh | ose diary is not accepted | d, is obliged to repeat the | |
| | professional pra | ctice. | | |
| Literature | - | | | |
| Basic literature: | ➤ Factory d | ata-organization of work | | |
| Described Learning Plan: | | | | |
| Weeks | Lecture | | - 1 stuurstuurse suud | |
| FIRST WEEK: | Recognition of the | managerial organization | iai structures and | |
| | manufacturing wo | orks at the factory. | | |
| Second week: | Constructive bure | au and project preparation | on | |
| Third week: | Design and sched | ule the working details | | |

| Fourth week: | To get familiar with production programs and production | | |
|--|---|--|--|
| | assortment. | | |
| Fifth week: | Preparation of technical-technological documentation. | | |
| Sixth week: | Realization of the production process of the chosen job (detail) | | |
| Seventh week: | To conduct and measure the details obtained according to the | | |
| | standards | | |
| Eighth week: | To get acquainted with the preparation of works (plans and work | | |
| | programs) | | |
| | | | |
| Ninth week: | Analysis of all machines in the ward (complete production facilities, | | |
| | plants, tools - production equipment and transport and domestic | | |
| | and foreign transport facilities). | | |
| Tenth week: | Creating reports for processing machines | | |
| Eleventh week: | To analyze the process of supplying with raw materials. | | |
| Twelfth week: | Maintenance of production facilities. | | |
| Thirteenth Week: | Knowing the hygienic - technical protection unit. | | |
| Fourteenth Week: | Writing the diary report | | |
| Fifteenth week: | Presentation of the Practice Diary | | |
| Academic Policies and Rules of Conduct: | | | |
| Regular attendance, keeping calm and active engagement in dialogue during lectures and exercises is mandatory. | | | |
