the life cycle of IT projects in accordance methodologies and techniques used.
Objectives of the course: The objective of the subject is to develop awar for and planning and project management. professional attitude in the use of appropriat tools in the management of IT projects.
Expected learning outcomes:Upon successful completion the student widemonstrate their ability to:• Explain the stages in the system deverand the activities that are carried out to application;• Apply basic project planning technique.• Demonstrate an understanding of steps and maintain effective development team• Explain the procedures needed to momereport upon an IT development project;• Use Microsoft Project and other softwand manage projects• Discuss and where appropriate apply project risk management.• Explain the ways in which appropriate of the products of an IT development assessed and assured.
Prerequisites: Basic knowledge in project management, include of initiating, planning, executing, controlling, closing an IT project

Contribution to the student load (which must correspond with learning outcomes)					
Activity		Hour	Day/Week	In total	
Lectures with numerical exercises		3	15	45	
Internship					
Contacts with teacher / consulta	tions				
Field exercises					
Midterm, seminars and projects.		3	2	6	
Homework					
Self-learning time student (at the library or		3	15	45	
at home)					
Final preparation for the exam		7	2	14	
Time spent on evaluation (tests,	quiz and				
final exam)		2		1.5	
Projects and presentations.		3	3	15	
				125

Assessment methods:	The student can choose to be assessed one of the two forms of				
	assessment,	given below:		ine in e gernie eg	
	1. Form 1: E	Evaluation wi	th colloquiums and	project	
	2. Form 2: E	Evaluation wi	th the final exam.	v	
			·		
	Form 1:				
	In the first fo	orm of assessi	ment "Assessment w	ith colloquiums	
	and project"	the student i.	s assessed in four ac	ctivities that are	
	carried out during the lectures:				
	1. Colloquium 1 (35%), individual assessment				
	2. Colloquium 2 (35%), individual assessment				
	<i>5.</i> Class activity (10%), individual assessment				
	4. Project (20%), group assessment.				
	If the student is not satisfied with the assessment achieved				
	according to form 2 to obtain a higher assessment				
		John 2 10 00	iam a mener assess	<i>menu</i> .	
	Form 2:				
	Through the final exam. the student can achieve a maximum of				
	70% of the p	oints from th	e total of 100 points	·. ·	
	~ *	-	- ^		
	The rest of th	he 20% point.	s must be completed	by group work in	
	in activity carried out during the lectures.				
	In Colloquiu	m 1, Colloqu	ium 2 and the final	exam, the	
	evaluation o	f the students	will be done throug	gh an evaluation	
	form, which	<u>must be co</u> mp	oleted individually b	y the student. The	

	evaluation form will contain 5 tasks through which the student's learning outcomes will be evaluated.			
	Activity in the class means the student's engagement in dealing with the issues discussed in the class, during the lectures.			
	Project (20%), group assessment: it is an activity in which students apply the acquired knowledge in a concrete project. It is carried out in groups of 3 or 4 students who are obliged to carry out the activity, document and present it to the subject professor.			
	Rating:			
	91-100 points – graded 10 (ten) 81-90 points – graded 9 (nine) 71-80 points – grade 8 (eight) 61-70 points – grade 7 (seven) 51-60 points – grade 6 (six)			
	0-50 points – The student repeats the exam			
The ratio of theory and	70% theory and 30% practice.

Designed learning plan				
Week:	Lectures and exercises to be held			
Week one:	Introduction to IT Project Management			
Week two:	Project Management and Information Technology Context			
Week three:	The life cycle of the project and phases of a projec			
Week four:	Phase Analysis : Methods for collecting requirements			
Week five:	Project planning and evaluation			
Week six:	Project Management Process Groups: A Case Study			
Week seven:	First Evaluation			

Week eight:	Project management tools and techniques, project selection	
	methods	
Week nine:	Work breakdown structures	
Week ten:	Analysis of the critical path and critical chain	
Week eleven:	Monitoring progress, project control and reporting	
Week twelve:	Project quality management	
Week thirteen:	Project Risk Management	
Week fourteen:	Presentation of project management by students with all process	
	groups and areas of activity	
Week fifteen:	Second Evaluation	
Academic policies and rules of conduct		

Regular attendance of lectures and exercises is necessary, as well as active participation with discussion and solution of tasks. Not impeding the progress required for learning using mobile phones turned off or in silent mode
